DESCRIPTION

Our Before and After School Care Program provides a safe, supportive, and engaging environment for school-age children outside of regular school hours. Designed to complement the school day, the program offers a balance of structured activities and free choice time while meeting state licensing standards.

Examples of program activities include:

- Supervised homework time with guidance and encouragement
- Hands-on activities and games that promote creativity and problem-solving
- Group games and team activities that build social skills and cooperation
- Art and creative projects using age-appropriate materials
- Physical activity and outdoor play to support health and energy release (Brand new playground coming soon!)
- Quiet activities such as reading, puzzles, and board games
- Daily routines that encourage responsibility, independence, and positive behavior

Children are supported by caring staff who provide consistent supervision, positive guidance, and a welcoming space to relax, learn, and connect with peers before and after school.
