

# Printmaking

Get ready to roll, press, and print. In this fun and hands-on after-school club, kids will explore the magical world of printmaking using simple tools and creative techniques.

They'll discover how textures and patterns come to life through repeating designs. It's a super satisfying and often surprising process that young artists absolutely love. Every print is a chance to experiment, express themselves, and create something completely unique.

No experience needed. Just bring your imagination and get ready for some inky fun!
