Course Description

This course, over two semesters, will help you master the basics of rightly interpreting the Bible. We will learn to interpret Scripture on its own terms by understanding the history of interpretation, how the Bible is organized, and some basic principles for interpreting texts Christologically, according to their genre, and in light of redemptive history. We hope that as you participate each week, your confidence in the Word of God, and your ability to enjoy fruitfully studying it will grow—along with your love for the One who wrote it!
