TOP LEFT - One of our four churches in Haikou City.

TOP RIGHT - One of our churches in the countryside (two hours south of Haikou).

Each of our churches have varying needs and characteristics, just as our churches here in America. However, all our churches love to meet, sing, fellowship, and to reach out to their family and friends. For them, Church is still the most important day of the week. It's the day they worship and hope for a future where God brings blessings to their country instead of judgments for being a country that is anti-God and anti-Church.

Continue to pray for our 'house churches'. Each year, they face trials and tribulations, but they continue to go to church while realizing that any Sunday could be the day that they are delivered to judgments from their government.

Churches around the world are suffering. Churches in America have yet to see suffering, but when that day comes, will we be found to be faithful, or will we abandon the faith?

I rejoice that America still has liberty to meet, to worship and to reach others without fear of repercussions.

MEDICAL: In October, I was recommended to a new doctor at UAB Medical to see a specialist. They were puzzled and said they would see how I would do without taking any new medications. Therefore, they have paused the heart medications that were causing side effects. If all is ok, this will be the course of action.

In the November / December timeframe, I will return to the new doctor at UAB for further neuro-tests to see if there is a residue of the chemicals residing within my muscles. I still have significant weakness in both legs.
