<p>Period 1 (9:00-10:00):  <b>Science in the Atomic Age</b>  <b>(covers: Chemistry and Life Science)</b></p>	<ul style="list-style-type: none"> <li>Textbook: <u>Science in the Atomic Age</u>  <b>Note:</b> Only one textbook per family is needed for students in grades 7-8.</li> <li>Notebook: Science in the Atomic Age Workbook (OPTIONAL) or purchase a simple spiral bound notebook (see explanation below)  <b>Note:</b> The Berean Builders company does not actually sell this notebook. It is created from a third party. The Berean Builders company themselves suggest handwriting out the questions with their answers and the lab notes to retain the concepts better. I actually called the company and talked to the author himself. However, if you would prefer that your child saves time and does not write out the questions and answers by hand, you can choose to purchase the notebook. Please note that the notebook simply contains the review questions written out with a little bit of space to answer each one, and lots of <u>blank</u> pages for the lab notes. This is why you can choose to purchase a blank spiral notebook and achieve the same results as buying the lab notebook and writing it all in there. It is completely up to you. Choose which option fits your family best.</li> <li>Answer Key and Tests for Science in the Atomic Age  <b>Note:</b> Only one of these packets needed per family.
