

# MEET THE TEACHER

## Ms. Worthey

### Welcome!

Hello there! Welcome to PreK! My name is Nicole Worthey and I am thrilled and honored to have the opportunity to work with your child this year. This marks my sixth year with C.L.U.M.P.S., and I eagerly anticipate getting to know your child and your family. Together, we will strive to build strong and supportive relationships that foster your child's learning and development.

### My Philosophy

My philosophy for teaching young learners is based on the understanding that each child comes into this world as a whole person with their own unique needs, preferences, and, above all, natural curiosity. I hope, as a educator, to help nurture and encourage students with their big feelings work on their emotional intelligence. I strive to help them foster their own self-confidence and to believe that they truly can "do hard things." I aim to help my students safely explore the world around them, unlocking their full potential through play-based learning.

### My Passions

My passions include many things, but foremost is my family. My husband and I have three wonderful children, two of whom have attended this school. I love anything crafting-related. I especially love combining science and art

### Need to contact me?

ProCare is the quickest and easiest way to get ahold of any of our staff members. Or you can email me at
